**POLICY OF THE INSTITUTE OF HIGH TECHNOLOGIES LLP IN THE FIELD OF INTEGRATED
MANAGEMENT SYSTEM**

Institute of High Technologies LLP (hereinafter IHT LLP) was established in NAC Kazatomprom JSC on February 05, 2002 (Certificate of state registration of a legal entity No. 45641-1910-LLP, certificate of state re-registration of a legal entity No.574-1910-02-LLP dated 05/02/2012) to solve the strategic tasks of the nuclear industry of Kazakhstan: innovative development and technological renewal of the industry, improving the quality and competitiveness of high-tech products, as well as addressing environmental issues.

The sole founder of IHT LLP with 100% participation is NAC Kazatomprom JSC.

The mission of IHT LLP is to ensure a significant contribution of new scientific developments to reducing the cost of natural uranium extraction and improving the production efficiency of NAC Kazatomprom JSC.

IHT LLP is fully aware of its responsibility to employees and other stakeholders for compliance with the requirements related to the quality of the service provided, the creation of safe working conditions and the preservation of a favorable environment.

The management of IHT LLP considers ensuring the quality of services provided, environmental protection, occupational safety and health protection to be priority elements of its activities, for which it supports and develops an integrated management system that meets the requirements of standards ST RK ISO 9001-2016, ST RK ISO 14001-2016, ST RK ISO 45001-2019.

The main directions and priorities for achieving a high level of quality of services provided, environmental protection, occupational safety and health protection are:

- full compliance and continuous improvement of the integrated management system;
- meeting the requirements of consumers, and also strives to exceed the requirements and expectations of consumers;
- compliance by personnel with the requirements established in regulatory and legislative documentation, including sanitary and hygienic standards and safety requirements;
- development of technological projects that meet the most modern scientific, technical and technological requirements with priority in solving quality and safety problems;
- ensuring continuous improvement of indicators in the field of occupational safety, health protection and minimizing the risks of fires, road accidents related to production activities;
- ~~protecting the environment by preventing or reducing negative impacts on it;~~
- maintaining constant business and friendly relations with the client and business partners;
- continuous training and professional development of staff at all levels, maintaining their qualifications at a high level;
- improvement of corporate governance forms, rational arrangement and effective use of knowledge, abilities and skills of employees, improvement of the information management system, and effective use of the accumulated knowledge base to improve the quality of services provided.
